Child Care and Preschool

# GARDEN GAZETTE

## NEWSLETTER | AUG 2021

### -BUZZWORTHY-

It's back to school month at Watch Me Grow! We are excited to jump into a new school year and are looking forward to lots of fun with the kids. This month we will be talking about our families, learning our new classroom rules and meeting lots of new friends.

It's that time of year where summer is winding down and fall is creeping up on us. Time to start thinking about school supplies, new schedules, and lots of paperwork. This is also a great time to build your child's excitement for Move Up Day at Watch Me Grow Child Care and Preschool. Remember, when you were really young the summer felt like a lifetime and heading back to school or moving up in a classroom came out of the blue. This is a great time to prepare your child for what's coming in the new school year and to build their excitement. Talk about the fun they are going to have, new friends and old ones. Discussing new routines and changes will help ease any nervousness or anxiety for your little one. Another great way to prepare your kids for moving up to a new class is by reading books with a similar theme. We have several listed on the news section of our website you may want to check out.

### -REMINDERS-

It's still hot in Arizona--please remember to apply sunscreen each morning. Water days will continue this month and come to an end after Labor Day.
